Tropical Weather Awareness

Five-Day Graphical Tropical Weather Outlook

National Hurricane Center Miami, Florida

Shower activity associated with a broad area of low pressure centered a couple of hundred miles south-southwest of the Cabo Verde Islands has become better organized since yesterday. Environmental conditions are forecast to be conducive for additional development, and a tropical depression is expected to form by the end of the week while the system moves west-northwestward across the tropical Atlantic Ocean. * Formation chance through 48 hours...medium...50 percent. * Formation chance through 5 days...high...90 percent. A tropical wave is forecast to move off the west coast of Africa in a few days. Some development of the system is possible over the weekend while the wave moves westward over the far eastern tropical Atlantic Ocean. * Formation chance through 48 hours...low...near 0 percent. * Formation chance through 5 days...low...30 percent.

Hazardous Weather

Chances for Showers and Thunderstorms Today

Weather Forecast Office
Amarillo, TX

Seasonable Temperatures

Issued Sep 05, 2018 4:03 AM CDT

f t NWSAmarillo

weather.gov/ama

Highs today will be in the upper 70s to middle 80s and precipitation chances are between 40-60% across the Panhandles. Scattered to widespread showers and thunderstorms today with a few of the storms possibly becoming strong. Main threats include gusty winds and small hail. Heavy rainfall will also be possible which may result in localized flooding/flash flooding concerns.

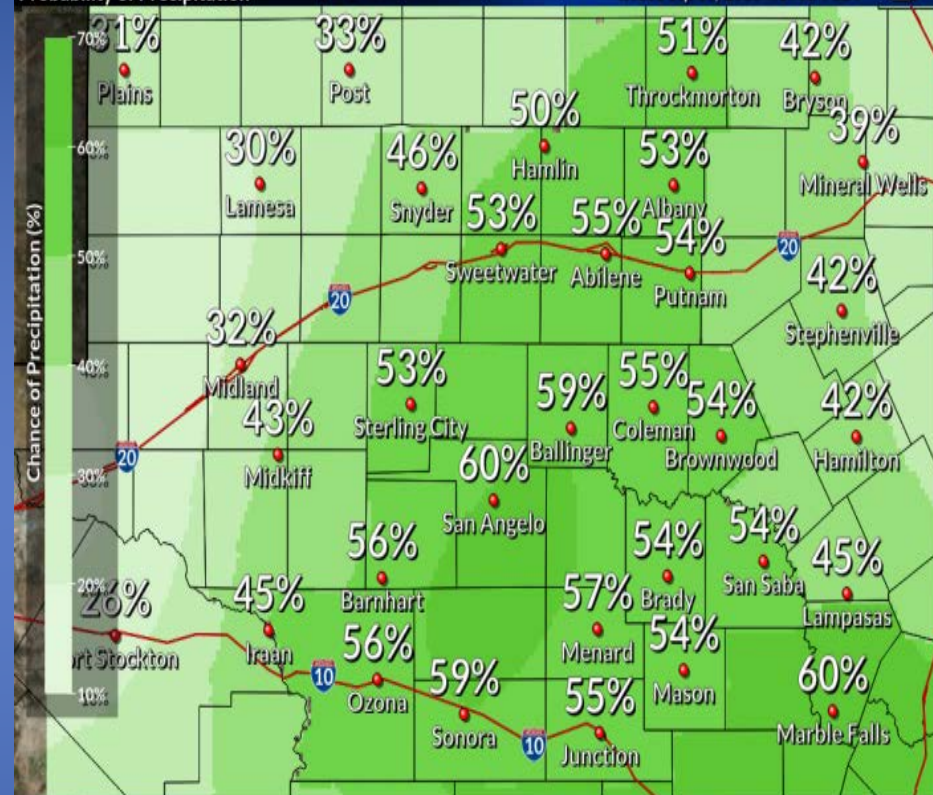

Scattered Showers and Storms

Weather Forecast Office
San Angelo, TX

Probability of Precipitation

Issued Sep 05, 2018 4:37 AM CDT

f t NWSsanAngelo

weather.gov/sjt

Scattered showers and a few thunderstorms will affect the area today. The main hazard will be heavy rainfall, which may result in localized flooding, especially in low lying and poor drainage areas. Temperatures will be on the cool side, with afternoon highs mainly in the middle 80s.

Hazardous Weather

Scattered showers and thunderstorms

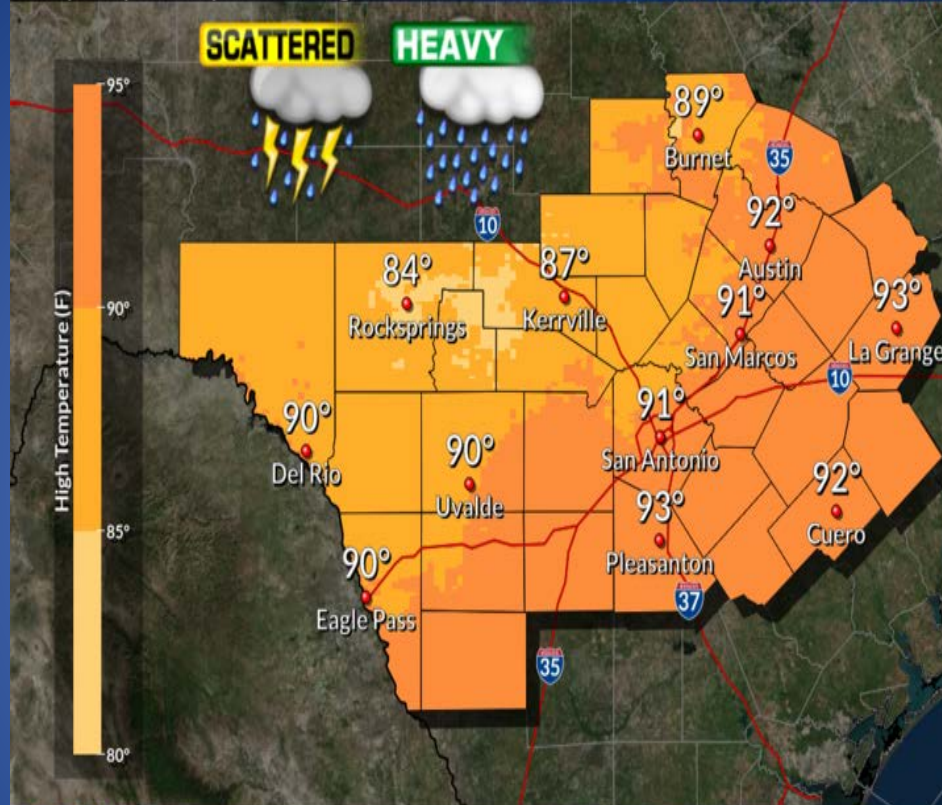

Weather Forecast Office

Austin/San Antonio, TX

Issued Sep 05, 2018 4:22 AM CDT

Locally heavy rains may cause flooding

f t v NWSSanAntonio

weather.gov/ewx

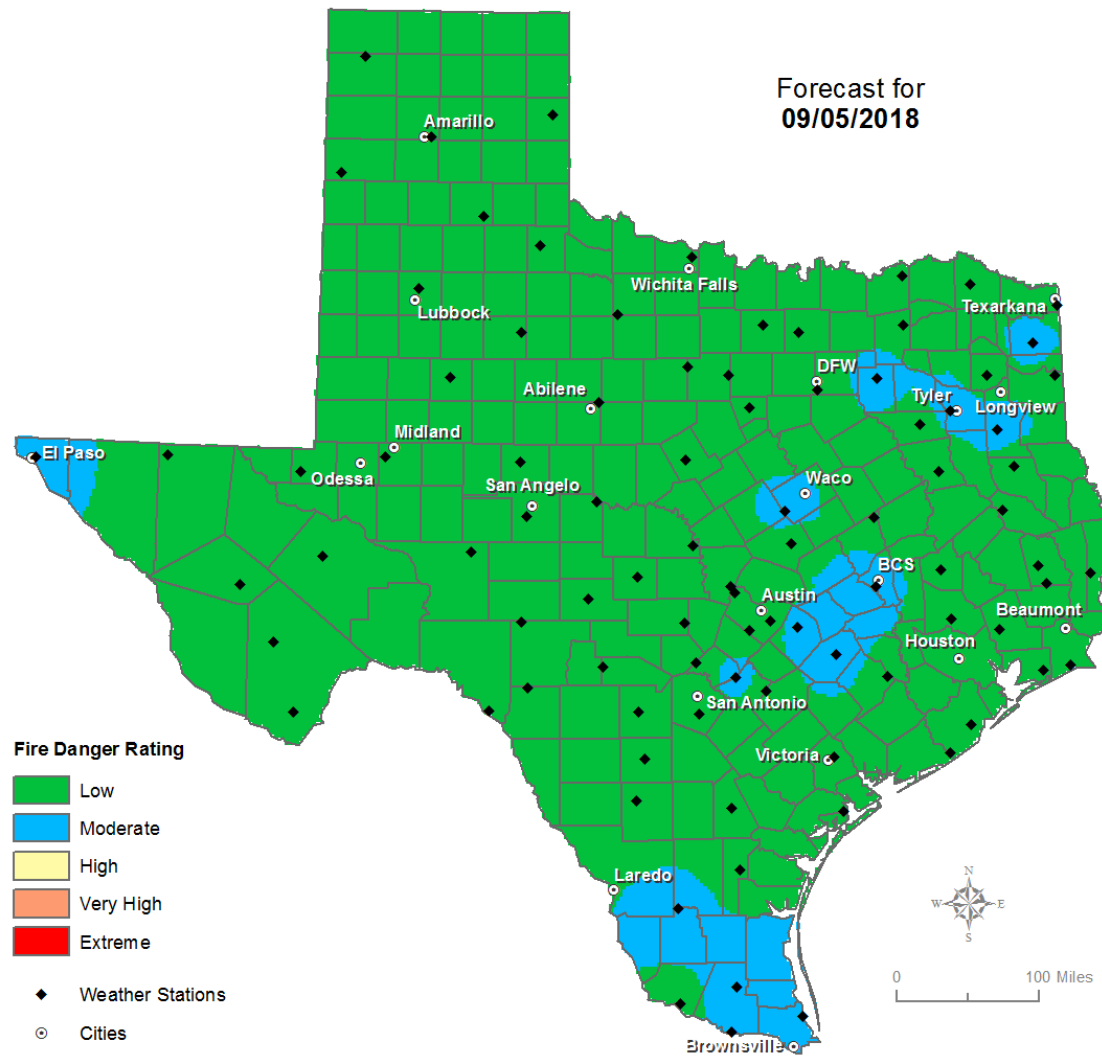

A weak disturbance will combine with a moist tropical airmass over South Central Texas to generate scattered showers and thunderstorms. Isolated areas of locally heavy rainfall are possible and may lead to flooding, especially in those areas that have had significant rainfall recently, including San Antonio metro into the southeastern Hill Country, then southwest to the Rio Grande. Wind gusts up to 40 mph are also possible in the stronger storms. Near to slightly below normal temperatures are expected.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
